Tumor Heterogeneity:  
Implications for Targeted Therapy

The Stanford Cancer Institute is pleased to invite you to attend the upcoming scientific symposium, **[Tumor Heterogeneity: Implications for Targeted Therapy](#)**.

The two-day event will offer an in-depth exploration of the key questions surrounding the phenomenon of cancer cell heterogeneity within individual patients, and the challenges these findings present to treatment strategies, including targeted molecular therapies. Please visit <http://cancer.stanford.edu/training/tumorheterogeneity.html> for program details.

## NIH NEWS

### **[NIH Request for Information: Soliciting Input for the National Institute of General Medical Sciences Strategic Planning Process](#)**

NIGMS has embarked on a strategic planning process to guide its decision making for the next 5 years. As a first step, Institute staff developed a draft statement of broad goals and objectives. As the Institute works on developing specific strategies and finalizing the plan, it would like comments and suggestions from scientists, scientific organizations and other interested parties.
